1. The abstract of the disclosure is objected to because the abstract should describe the structure of the device instead of the method to make the device.

Correction is required.

2. The applicant should provide a copy of the reference (Japanese Patent Application No. Hei-4-100479) cited in page 9 of the specification.

3. The disclosure is objected to because of the following informalities: It is believed that the reference numeral for the gate electrode (page 38, lines 6-7) is "907" instead of "917".

Appropriate correction is required.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "1109" has been used to designate both anodic oxide and phosphorus-doped region. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the
